Overview

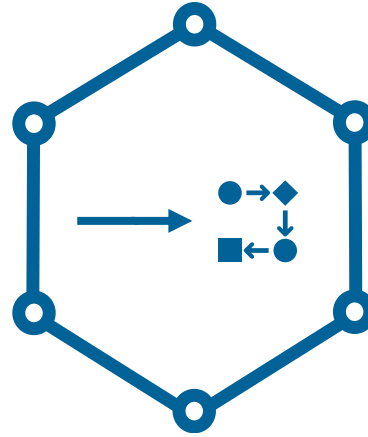

- Large organizations have lot of internal data
 - Customer profiles
 - Product offerings
 - Transactions
- They also consume external data from third party providers
 - News reports
 - Funding decisions
 - Supplier relationships

Overview

- Knowledge graph by integrating external and internal data
 - 360 view of customer
 - Fraud detection
 - Risk assessment

Overview

- Knowledge graph by integrating external and internal data
 - Schema design
 - Relating the schema of sources to the knowledge graph schema
 - Record linkage
 - Recognizing if two instances refer to the same object in the real-world

Knowledge Graph Creation
